

Chief Science Officer

We are looking for a Chief Science Officer who will join our startup full-time in January 2013. Our company is developing a Facebook application that generates personalized news and job recommendations. Your main responsibility is the further development and evaluation of the set of algorithms that form the basis of our recommender system.

What we have to offer:

- An attractive package consisting of equity and salary
- An important role in the shaping of the company
- Intellectually stimulating challenges at the intersection of psychology, natural language processing and social networks
- A job that involves reviewing relevant literature, conducting your own applied research and visiting conferences
- A Scrum-based workflow with the best tools available to do the job

What we are looking for:

- A background with project experience in machine learning, natural language processing, psychology or a related field
- Scientific credentials (publications, recommendations, awards or degrees)
- At least basic experience in object-oriented development (preferably, in Java, C# or C++) and database management (preferably, SQL and NoSQL)
- Ability to explain complex theories to laymen
- Fluent spoken and written English. German skills are not a determining factor. Willingness to move to Germany (or within Germany) is.

Please send your application, stating “Chief Science Officer” in the subject, to:
